# Corporate Overview

*A Vietnam Era Veteran Owned Small Business*

**Company Background and Capabilities**

***JESCO Construction Highlights***

Since 1969, John E. Shavers Company has been providing innovative technology combined with responsive, professional service to meet the marine, heavy/civil, commercial, industrial, and disaster response needs of public agencies and private industry. Starting out as a commercial contractor, John E. Shavers Company's reputation soon spread and took them into different markets.

In January 1986, John E. Shavers Company consolidated its diverse construction operations into a new company named JESCO Construction (JESCO). John E. Shavers Company had been providing construction services to clients for many years, but the volume of this work significantly increased. JESCO was established as a separate company to provide a full suite of construction services at competitive prices, including comprehensive construction and design-build/EPC services to the Transportation, Marine, Commercial, Industrial, Water, and Federal markets.

In conjunction with our subsidiaries and affiliates, JESCO delivers a full range of services that satisfy client needs for progressive construction management, general contracting, and design-build/EPC. JESCO maintains an integrated network of offices in the south and southeast with a long tenured dedicated team of professional and support staff employees.

Private ownership promotes a strong commitment to clients, high staff motivation, dedicated workforce following, and low staff turnover. The value we bring to our clients through our committed, motivated staff is proven time and again by our consistently high volume of repeat business.

Our capabilities extend from project conceptualization/ planning through construction management and construction. While our core strength is marine, disaster services, heavy/civil/utilities, industrial, and commercial, our expertise also encompasses a broad spectrum of technical services in environmental management and water resources, as well as aggregate material supply. This full scope of environmental and infrastructure capabilities enables us to provide clients with "one-stop shopping" to meet virtually any project need.

**Marine**

*Sporting one of the the largest privately owned marine fleets along the Gulf Coast, JESCO provides marine construction, beach re-nourishment, and mechanical and hydraulic dredging for streams, creeks, major waterways, and deep water*

**Disaster Services**

*From hurricane Camille in the 60's, thru Dennis and Katrina in '05, JESCO has responded with debris removal, cleanup, soil stabilization, dredging, wave barriers, rip rap, emergency road repair, and overall restoration for local, state, and federal clients*

**Commercial**

Hospitality/gaming and turnkey condo development thru historic renovation and military housing - JESCO can handle all your commercial needs

**Industrial**

The JESCO team has a solid history of providing plant electrical, mechanical, and pipefitting capital construction, outages, and turnarounds, as well as marine intakes and pond construction/reclamation

**Heavy/Civil/Utilities/Materials**

From site/environmental assessments and remediation thru demolition, roads, bridges, water/waste water, and electrical, to granite armor stone and aggregates, JESCO has the resume and resources to handle all your site work
